Projects

Netflix Clone [github](#)

- Built a responsive clone of the Netflix homepage using pure HTML and CSS.
- Implemented modern layout techniques like Flexbox and Grid to mimic Netflix's UI.

JeevanSetu [github](#)

- Developed a modern, full-stack web application to create, manage, and verify emergency health profiles using a unique JeevanSetu ID.

Portfolio [github](#)

- Designed and built a responsive portfolio website to showcase technical skills, key projects, and contact information.
- Focused on clean UI/UX and accessibility to provide a seamless user experience.

Extra Curricular

Technical Support Member : DITU ACM Student Chapter , *Sep 2024 – Present*

- Provided backend and technical assistance during events and coding competitions.
- Helped manage technical infrastructure for workshops and seminars organized by the chapter.

Workshop Speaker – Web Development : *CS101 Workshop, Aug 2024*

- Made students familiar with the field of web development, covering fundamentals of HTML, CSS, and JavaScript.
- Conducted a brief live demo to showcase how a simple responsive webpage is built.

Workshop Speaker – Data Structures & Algorithms : *DSA Workshop, April 2025*

- Explained key DSA concepts such as sorting algorithms and hashing.
- Engaged students with problem-solving exercises and live implementation.
